

BRAND AT A GLANCE · 2026

A brand for the future of public services

Our visual system — navy-led, precise and human — built to present mission-critical public-sector data with clarity and trust.

THE IDEA

Data, turning into progress

PubliX Group unites founder-led SaaS companies to modernise public services across the Nordics. The mark is built from pixel-squares that **rise like a bar chart** — data becoming momentum, the accelerator at work.

Everything else stays calm and squared-off: deep navy for authority, a single bright azure for action, and a disciplined palette engineered for charts and financial reporting.

the mark

CORE COLOUR

A navy core, an azure spark

Navy carries trust and authority; one azure is the digital signal for action and links. Cool slate neutrals keep everything quiet.

Brand navy

Action azure & status

DATA COLOUR SYSTEM

Built for financial data

Because our companies run on grants, budgets and savings, charts get a dedicated, brand-cohesive palette — categorical series, a loss-to-gain diverging scale, and fixed finance semantics.

Categorical — up to 8 series

Diverging — loss ↔ gain

-18% under budget

+18% surplus

Budget variance by month

Grant volume by sector

TYPOGRAPHY

Geometric meets humanist

Sora & Hanken Grotesk

display + text · the digital and the human voice

Sora — display

**Headlines, big numbers
and the wordmark voice.**

Hanken Grotesk — text

Readable, warm body text for everything
our partners need to understand — set at
a comfortable measure and rhythm.

IN THE PRODUCT

Consistent, accessible UI

A shared component library carries the brand into every portfolio product
— buttons, status badges, forms and data tables.
